ALTAI REGION

Export Profile

**Viktor Petrovich
Tomenko**

Governor of the Altai Region,
Chairman of the Government
of the Altai Region

« The Altai Region is one of Russia's leading agricultural and agro-industrial producing regions. The region not only fully meets its own domestic demand but also ships a substantial share of its products to all constituent entities of the Russian Federation and to more than 50 countries across both neighboring and distant international markets.

Agricultural and food products from the Altai Region are becoming increasingly sought after in global markets every year. The region ranks second in Siberia in terms of agricultural and food exports and, in 2025, rose to 14th place among all constituent entities of the Russian Federation for the first time.

In 2025, exports of agricultural products from the Altai Region increased by 38.6% compared with the previous year. Compared with 2021, exports to international markets grew by 1.7 times. Among the broad range of exported products, the most in-demand items among foreign partners include sunflower oil and rapeseed oil, sunflower and flax seeds, legumes, and flour and grain-processing products. крупная Products.

A significant trend has been the transformation of the export structure. While grain and oilseed raw materials previously dominated exports, today products with higher added value – particularly oils and fats products – play the leading role.

In addition to the regional project “Export of Agricultural Products of the Altai Region,” a comprehensive regional export development program has been developed and approved. The program identifies priority product categories, target markets, and specific mechanisms for achieving export growth targets.

Major export-oriented investment projects are currently being implemented across the region. To significantly increase poultry production, Cherkizovo Group PJSC (Altai Broiler Branch of Kurinoye Tsarstvo JSC) is carrying out a large-scale upgrading of its production facilities, including the construction of poultry houses, a feeding complex, and the upgrading of slaughtering and processing facilities. As a result, poultry meat exports to China are expected to increase substantially. Construction of an oil extraction plant by Sigma Holding Management Company LLC is also ongoing. The company plans to export its products to China, India, and the countries of Central Asia.

ALTAI REGION

Established:
1937

The Altai Region is part of the Siberian Federal District and borders Novosibirsk Region, Kemerovo Region, the Altai Republic, and the Republic of Kazakhstan

The region is crossed by major highways connecting Russia with Mongolia and Kazakhstan, as well as a railway linking Central Asia with the Trans-Siberian Railway. International air routes also operate through the region

The Altai Region is Russia's largest producer of environmentally friendly food products

Food manufacturing is one of the leading sectors of the regional industrial economy

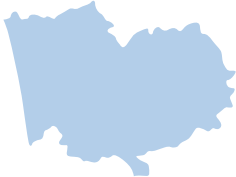

The region is classified as an area of high agricultural risk due to climatic conditions

The region ranks 2nd in the Russian Federation by sown area of grain and legume crops

Road Freight Turnover

Overview of the Transportation System

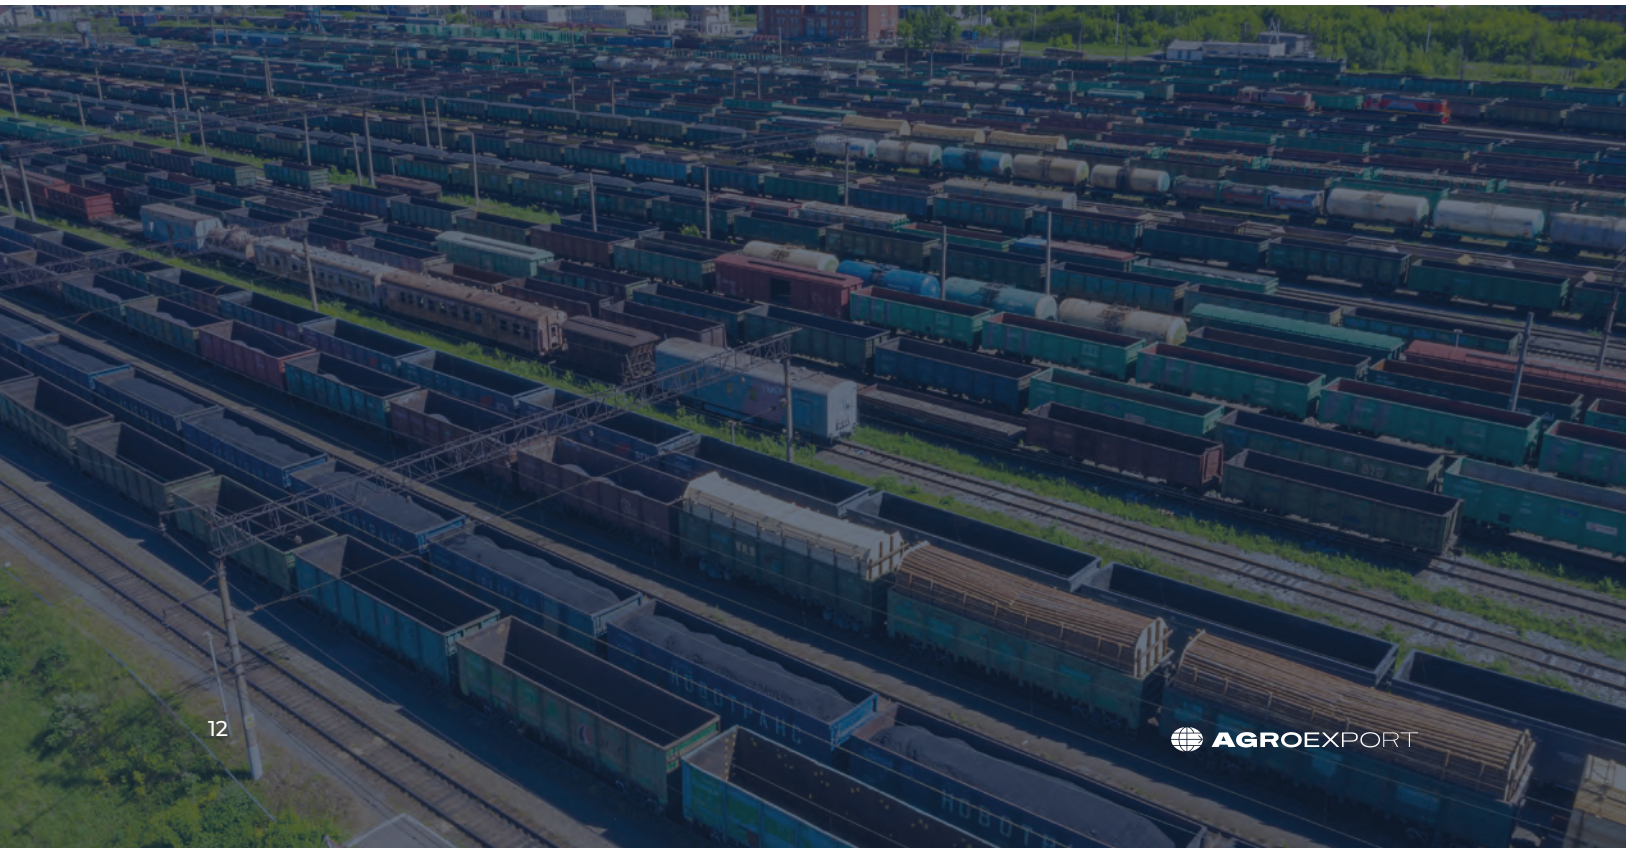

The railway network of the Altai Region extends for more than 1,500 km.

Major railway corridors crossing the region include: Novosibirsk – Berdsk – Iskitim – Cherepanovo – Novoaltaysk – Barnaul – Aleysk – Rubtsovsk – Semey, and Novoaltaysk – Barnaul – Kulunda – Pavlodar.

Key railway stations include Barnaul, Biysk, Rubtsovsk, Altayskaya (Novoaltaysk), and Aleyskaya (Aleysk).

Road transport accounts for a significant share of domestic freight traffic and is the only mode of transportation available to many foothill and mountainous areas.

The region has direct access to the state border with the Republic of Kazakhstan and occupies a strategic transit position between the largest cities of the Siberian Federal District.

Logistics Projects

Infrastructure Development Investments

Project: Construction of a Transport and Logistics Center in the Pervomaysky District of the Altai Region. The project includes the construction of a railway container terminal with an annual cargo throughput of 3.5 million tonnes. The facility will feature railway infrastructure capable of receiving and dispatching up to 8 trains per day, a container storage area, an 18,000 m² agricultural logistics complex for containerized shipments, and a customs control zone.

Investor: WAYLINK LLC (SWIFT Group)

Site Area: 30 hectares

Cargo Throughput: 3.5 million tonnes per year

Investment Volume: RUB 5.0 billion

Implementation Period: 2025-2027

Status: Under Implementation.

Oils and Fats Products

Oils and Fats Products

Production of Vegetable Oils and Oilcakes/Meals, thousand tonnes

Data Source: Regional Agro-Industrial Management Authorities (ROU AIC).

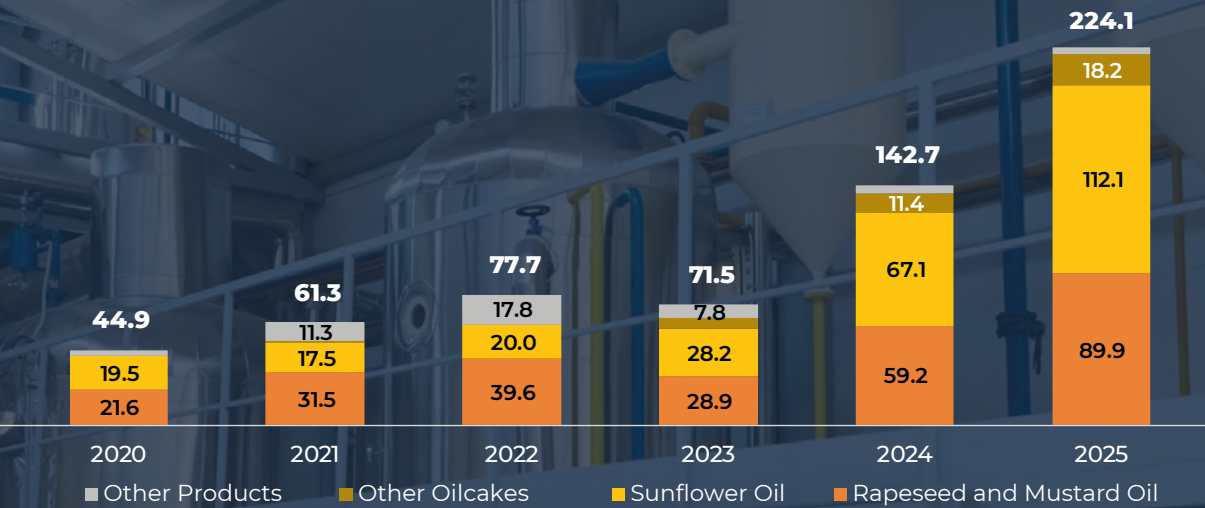

The Altai Region is one of Russia's major sunflower oil-producing regions.

The region is also actively expanding its rapeseed oil

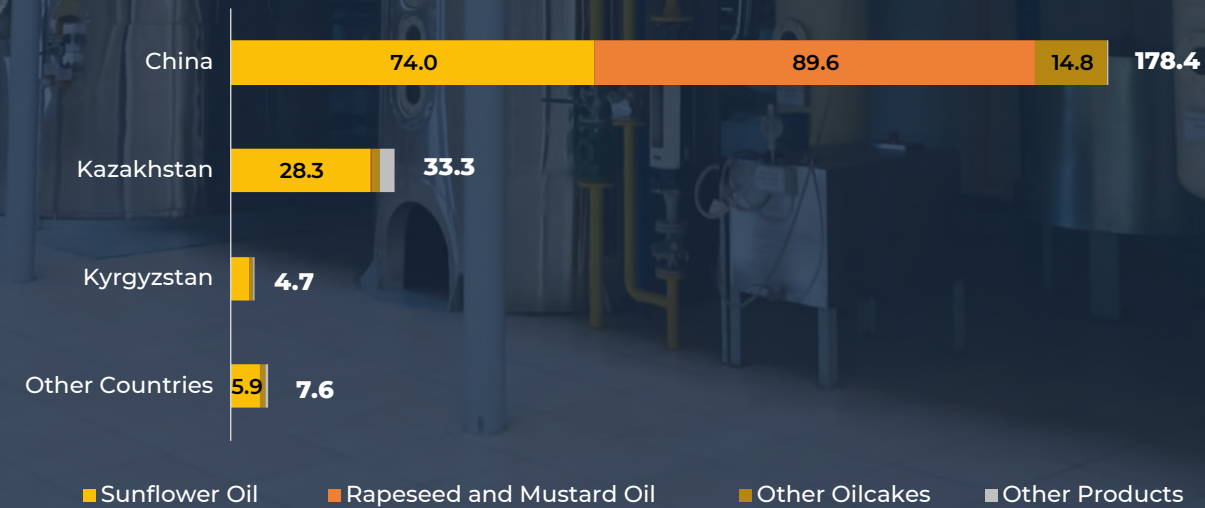

extraction capacity. In addition, the Altai Region has significant potential for increasing soybean oil production.

Oils and Fats Products

Export Product Structure, 2020-2025, mln USD

Export Destinations for Oils and Fats Products, 2025, mln USD

The oils and fats industry is a key export sector of the Altai Region's agro-industrial complex.

The principal export products are sunflower oil, rapeseed oil, and oilcakes. **China and Kazakhstan** are the leading importers of these products.

Oils and Fats Products

Promising Export Markets

The highest-priority markets for expanding export geography and increasing exports of oils and fats products are **Mongolia, Uzbekistan, and Belarus**.

Export Status	Active Exporter
Key Export Markets	China, Kazakhstan, Uzbekistan, Kyrgyzstan, Turkmenistan
Total Export Volume	USD 48.9 million, 52.5 thousand tonnes
Revenue	RUB 10.1 billion
Export Share of Revenue	40.6%
Website	divoaltaya.ru
Contacts	+7 (385-81) 35-0-12, +7 (3852) 59-52-71, +7 (800) 551-85-14 dival-22@yandex.ru

Divo Altaya LLC has been operating for more than 30 years and is currently one of the largest producers of packaged sunflower oil in Siberia. The company uses exclusively local raw materials – sunflower seeds grown on the fertile soils of the Altai Region. Production is carried out without the use of chemicals, preservatives, or artificial additives. The oil is produced using a gentle purification process and a unique direct-pressing technology, preserving the full range of vitamins naturally present in sunflower seeds. Over the past three

years, the company has nearly tripled its production rate. Processing capacity has exceeded 650 tonnes per day, sunflower seed processing volume has increased by 224%, and oil production has grown by 237%.

In recent years, the company's base of export customers has expanded significantly. Export revenue has been increasing by 5-10% annually. Today, 50% of Divo Altaya's production is exported to international markets.

Blago-Biysk LLC Oil Extraction Plant is one of the largest producers not only in the Altai Region but throughout Siberia.

Commissioned in 1927, the plant is one of the oldest processing enterprises in the Siberian Federal District.

The company specializes in sunflower processing and the production of bulk sunflower oil and meal.

Oils and Fats Products

Key Current and Potential Exporters

Products	• Unrefined Rapeseed Oil • Rapeseed Oilcake • Grain and Oilseed Crops
Brands	SEUS
Export Status	Active Exporter
Key Export Markets	China, Mongolia, Vietnam, South Korea
Total Export Volume	USD 43.3 million, 70 thousand tonnes
Revenue	RUB 5.7 billion
Export Share of Revenue	80%
Website	seus.ru
Contacts	+7 (903) 990-66-00 export@seus.ru

The Siberian Export Union (SEUS) operates 9 grain elevator complexes with a combined one-time storage capacity of 770,000 tonnes. The company operates five oil processing plants and maintains its own fleet of agricultural machinery.

Siboleum's facilities are environmentally friendly, waste-free production operations.

No chemical additives are used in the production of cold-pressed unrefined flaxseed, sunflower, and rapeseed oils.

The oil is extracted on modern presses using the same principle employed for centuries-pure mechanical pressing of the seed.

By-products include high-protein oilcake and sunflower husks.

Oils and Fats Products

Key Current and Potential Exporters

Orekhovy Altai LLC

Products	Unrefined Oils from Nuts, Seeds, and Fruits
Brands	ALNUT, Made in Altai
Export Status	Active Exporter

Key Export Markets	China, Kazakhstan, Mongolia, Kyrgyzstan, Vietnam
Total Export Volume	USD 1.3 million, 1.8 thousand tonnes
Revenue	RUB 1.1 billion
Export Share of Revenue	17%
Website	altay-pomestie.ru
Contacts	+7 (3852) 200-199 altaypomestie@yandex.com

Altayskoye Pomestie LLC is one of the largest sunflower oil producers in the Altai Region. The plant was commissioned in 2019. The total production area exceeds 6 000 m².

All sunflower oil is produced using a cold-pressing process combined with gentle purification techniques. Refining is carried out using an alkaline refining process. The company operates its own transportation fleet, including more than 12 refrigerated trucks and 4 oil tankers. Products are dispatched within three business days.

Oils and Fats Products

Key Current and Potential Exporters

Katun Oleum LLC

Products	• Oils from Nuts, Fruits, and Seeds • Fruit and Berry Oils
Brands	ALTAMIN
Export Status	Potential Exporter
Key Export Markets	Belarus, Kazakhstan, Uzbekistan, Mongolia, China
Revenue	RUB 30 million
Website	altamin.ru
Contacts	+7 (960) 950-63-05 2272000177@mail.ru

Katun Oleum LLC is an Altai-based company established in 1998, specializing in advanced sea buckthorn processing and the production of sea buckthorn oil using its own patented pharmaceutical-grade technology.

In 2024, the company launched the ALTAMIN brand, a line of sea buckthorn oils with varying concentrations of natural carotenoids (50, 180, and 300 mg%). The products are designed for everyday use and specialized nutrition programs, including a formulation free of added sunflower oil. Production facilities are capable of processing up to 800 tonnes of sea buckthorn annually.

Product quality is ensured through the company's own laboratory and multi-stage quality control at every stage of production. Products comply with both Russian and international standards and are registered under the Honest Sign product traceability system.

ALTAMIN products received a Gold Medal and First-Degree Diploma at the “Our Brand – 2025” tasting competition in Ufa.

The company actively follows global trends in functional nutrition and nutraceuticals. Development of the dietary supplement segment is regarded as one of the company's key strategic growth priorities.

Алгрейн

**Roman Vitasovich
Semashko,
Sole Proprietor**

Products	• Unrefined Rapeseed, Sunflower, and Soybean Oils • Rapeseed, Sunflower, and Soybean Oilcakes • Vegetable Oil Foots (Sediment) • Full-Fat Extruded Soybeans
Brands	Algrain
Export Status	Potential Exporter
Key Export Markets	China
Revenue	RUB 1.5 billion
Website	algrain.ru
Contacts	+7 (903)947-13-90 +7 (983)185-00-08 rs@algrain.ru kvs@algrain.ru

R. V. Semashko has been operating in the grain and grain-processing market since 2009. The company is engaged in both manufacturing and trading activities.

The company produces animal feed (4 000 tonnes per month), unrefined vegetable oils (100-300 tonnes per month), oilcakes (400-600 tonnes per month), and full-fat extruded soybeans (1 200 tonnes per month). It also supplies feed additives and meals and provides transshipment services for grain, legumes, groats, and oilseed crops. The company maintains partnerships with poultry farms, agricultural producers, traders, and private farming operations.

Products can be shipped in bulk, big bags, sacks, on pallets, or in liquid form

using tank trucks, flexitanks, IBC containers, and drums.

The company owns two feed mills, an oil processing plant for rapeseed, sunflower, and soybeans, two soybean extrusion units, and a grain and oilseed storage and transshipment complex. Construction of a third feed mill is currently underway. A grain elevator and transshipment facility is planned for future development.

Quality control, including chemical analysis, is conducted by the company's in-house laboratory. The company is accredited in the CIPHER system for exports to China and in the Cerberus system for exports to EAEU member states.

The company is currently pursuing additional accreditation to export oilcakes and full-fat soybeans to countries outside the EAEU, including China.

The Goodwill agricultural holding ensures grain quality and environmental safety throughout the entire production chain, from seed selection to product delivery to retail outlets.

The holding's seed stock is the result of many years of breeding work conducted by leading genetics and seed-production research institutes in Russia, Belarus, and Germany. Goodwill's fields are located in the foothills of Altai, away from major highways and industrial facilities.

The agricultural holding cultivates buckwheat, oats, barley, peas, millet, wheat, and corn. The company employs advanced technologies for cultivation, harvesting, and grain processing.

The company's products comply with ISO 22000 international food safety standards, with compliance regularly verified. The company has many years of experience supplying products both domestically and internationally.

The trading and manufacturing company “RUSAN” was established in 2013.

The company produces both cold-pressed and hot-pressed rapeseed oil and is also an exporter of grains and legumes.

The group includes three processing workshops for the production of rapeseed oil. The processing capacity exceeds 200 tonnes of raw material per day, producing 80,000 liters of oil daily.

The company currently carries out regular oil shipments to China to the following destinations: Tianjin, Nantong, Shanghai, Chongqing, and Fangchenggang.

The priority activity is the export of high-quality goods produced by the company itself and other producers from the Altai Region to countries of the near and far abroad. Products are shipped by rail and road transport.

All products are certified and accompanied by a full set of documentation. In addition to trading activities, the company provides transshipment services and purchases grains and oilseeds through its own grain terminal complex.

Rikon LLC is a Russian producer of high-quality cheeses made using a special traditional recipe. The company was founded in 2001 in the dairy region of the Altai Region, in the settlement of Zimari.

The company uses high-quality cow's milk for cheese production. Its own raw material base, high-tech equipment, and strict ingredient selection ensure a consistently high level of product quality.

The company currently produces soft cheeses under the LAMI brand, butter under the Fermerskaya Sboyka brand, ghee under the LAMI brand, and snack products under the ELLAZAN brand.

Since 2021, the company has been developing its export activities and directly supplying products to Kazakhstan. Its products are available in various retail chains in Kazakhstan.

The company's export sales strategy aims to increase sales volumes in key retail chains in Kazakhstan.

The company plans to achieve leading positions in the markets of Kazakhstan, Mongolia, Vietnam, Korea, Japan, and Belarus.

Dairy Products

Key Current and Potential Exporters

Barnaul Dairy Plant JSC

Products	• Milk And Cream • Fermented Dairy Products • Butter • Cottage Cheese • Curd Snacks • Sour Cream • Drinking Yogurts • Baby Food • Cheeses
Brands	Milk Fairy Tale, Lact, Modest, Chastitsa Altaya, Romber, Chuysky Cheese
Export Status	Potential Exporter
Key Export Markets	Mongolia, Eurasian Customs Union countries
Revenue	RUB 13.1 billion
Website	molskaz.ru
Contacts	+7 (3852) 50-37-58 info@molskaz.ru

Barnaul Dairy Plant JSC was founded in 1978. It currently operates three production facilities and is one of the largest dairy producers not only in the Altai Region but also in the Siberian Federal District, ranking 3rd among milk processors in Siberia.The company is also among the Top 50 milk processors in Russia. The plant produces over 250 dairy product items, with a milk processing capacity of 1,000 tonnes per day.

The company cooperates with regional and federal retail chains. Its product range is distributed across the Siberian Federal District, and shipments are also delivered to Central Russia.

Dairy Products

Key Current and Potential Exporters

Brukke LLC

Products	• Butter • Cheeses • Whole Milk Products • Ice Cream
Brands	Brukke
Export Status	Potential Exporter
Key Export Markets	China, Kazakhstan
Revenue	RUB 1.9 billion
Website	brukke.com
Contacts	+7 (38539) 22-200 brukke@mail.ru

Brukke LLC has been operating since 1995. The dairy processing plants “Grishkovka” and “Orlovo” specialize in dairy, butter, and cheese production, with cheese and butter accounting for the majority of output, while whole milk products represent only a small share.

The enterprise consists of a dairy plant, meat processing plant, and flour mill.

Dairy Products

Key Current and Potential Exporters

Kiprino Trading House JSC

Products	• Butter • Cheeses
Brands	Altagio, Kiprino, Romanovsky Butter & Cheese Maker, Rodnoye Dobroselovo
Export Status	Potential Exporter
Revenue 2025	RUB 10 billion
Website	kiprino.ru
Contacts	+7 (3852) 61-03-01 td@kiprino.com

Kiprino is one of the leading cheese and butter producers in Russia, with its factories located in the Altai Region, an environmentally clean region of the country. An efficient and stable raw material base is the foundation of Kiprino's high-quality finished products.

The taste and aroma of cheese are largely determined by the milk from which it is made. The company's range includes more than forty products made from natural Altai milk.

The quality of its cheeses and butter has been repeatedly confirmed by awards at regional and international competitions and exhibitions.

APPENDIX

Ilya Ilyushin

Head of the Federal Center "Agroexport"

The Federal Center "Agroexport" is an organization established by the Ministry of Agriculture of Russia to develop agricultural exports.

Agroexport has become a centralized hub of verified information on Russian agricultural producers and serves as a communication platform with foreign partners. The center works in cooperation with Russian agro-industrial producers across all sectors including grain producers, oil and fat industry companies, meat and dairy producers, confectionery manufacturers, beverage producers, processed food producers, other agricultural producers, industry associations, and more than 5 000 international trade partners. This integrated approach enables effective B2B meetings and targeted partner matching.

We look forward to mutually beneficial and productive cooperation!

The Rosselkhoznadzor Directorate for the Altai Region and the Altai Republic is a territorial body of Rosselkhoznadzor and performs control and supervisory functions in the following areas:

- Veterinary matters within the framework of state veterinary supervision;
- Circulation of veterinary medicinal products;
- Plant quarantine and protection;
- Safe handling of pesticides and agrochemicals;
- Maintenance of soil fertility;
- Ensuring the quality and safety of grain, groats, compound feed, and components used in their production;
- Grain processing by-products and agricultural plant seed production;
- Land relations (in matters concerning agricultural land);
- Compliance with legislation in the field of viticulture and winemaking (except for licensing issues, provision of public services, and state control (supervision) regulated by legislation governing the production and circulation of ethyl alcohol, alcoholic beverages, and alcohol-containing products);
- Functions aimed at protecting the population from diseases common to humans and animals, as well as implementing specific tasks and functions of Rosselkhoznadzor established by the legislation and other regulatory legal acts of the Russian Federation.

Veterinary Directorate of the Altai Region

Website: vet.alregn.ru

Address: 158 Shevchenko St., Barnaul, Altai Region, 656056

E-mail: vetak@alregn.ru

Phone: +7 (3852) 20-55-65 (Reception Office).

The Main Objectives of the Veterinary Service of the Altai Region are:

- Prevention and eradication of infectious and mass non-infectious animal diseases;
- Ensuring the veterinary and sanitary safety of products and raw materials of animal origin;
- Protection of the population from diseases common to humans and animals;
- Protection of the territory of the region from the introduction of infectious animal diseases and the importation from other constituent entities of the Russian Federation of raw materials and products of animal origin that pose veterinary and sanitary risks.

Definition of the Agricultural Production Output Indicator

The agricultural production output indicator of the constituent entities of the Russian Federation is calculated by summing the indicator “Agricultural Production” and the indicator “Value of Shipped Goods of Own Production, Works Performed, and Services Rendered by Own Resources” for the manufacturing sector, with the share attributable to the food industry identified separately.
